HOSET

Hoset Group is a leader on the Ukrainian market in the doors designing, manufacturing and selling. The company's products like concealed SecretDoors, sliding doors and AluDoors partitions, interior doors in the New Classic style, SecretDoors Professional inspection doors of the concealed installation and entry Security Doors are already widely present on the market.

Every company's brand represents its unique area, demonstrating the perfect combination of the modern technologies, design solutions and an impeccable quality.

Hoset Group works in the top segment of the market and its products are rightfully honoured to have the highest quality mark "Made in Ukraine".

OUR ADVANTAGES

1

Warranty

3 year warranty is applied for all items.

2

Certified products

Products of the company are certified according to the international standard ISO 9001.

3

Ecological materials

Eco-friendly materials are used for the door production.

4

Wide range

A wide assortment comprises more than 50 models.

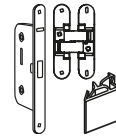

5

Exclusive varnishes and paints

We use exclusive varnishes and paints by AkzoNobel company.

6

Complete set

Doors come with Anselmi (Italy) adjustable concealed hinges, AGB (Italy) magnetic lock mechanism, Q-lon door seal (Great Britain).

7

Non-standard accessories

The set of non-standard accessories offered by a producer includes a drop seal, hinges equipped with door closers, an electric bolt lock, etc.

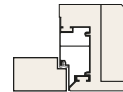

8

Invisible door straightener

All wooden door leaves are equipped with the straightener, which provides control and regulation of the door leaf geometry.

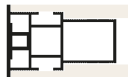

9

«Invisible» system

There is a possibility to produce the doors from the collection «New Classic» on the concealed aluminium jamb.

10

Aluminum door leaf frame

Modern design requires modern solutions. The aluminum frame of the curtain provides maximum practicality and adds exclusivity to every interior.

11

Design products

We produce wall panels, boiserie panels and sliding systems in combination with the interior doors from the «New Classic» collection.

12

Increased noise insulation

Modern soundproofing materials provide maximum comfort and coziness in every home.

A careful development means the production in compliance with the rules of environmental and natural resources protection according to the socio-economic policy. ET GROUP group of companies operates in accordance with the European standards UNI EN ISO 9001 for quality and UNI ENISO 14001 for the environmental protection, which demonstrates the voluntary desire of the company management to carry out its activities without harm to the environment. The environmental policy is respected in compliance with certain production processes, as well as in the use of specialized raw materials such as selective wood, water-based paint, solvent content free adhesive. All this together combined with the production facilities for cleaning, filtration and recycling makes the whole production process safe and environmentally friendly.

A photograph of a family of four walking through a sun-dappled forest. The father, on the left, is wearing a white t-shirt and light-colored shorts, holding the hand of a young girl in a floral dress. The mother, on the right, is wearing a white off-the-shoulder dress and holding the hand of a young boy in a light-colored shirt and shorts. They are all smiling and walking towards the camera on a grassy path.

WALL PANELS

At Hoset Group, the love of nature and beauty guides all decisions, seeking a sustainable balance between people and care for our environment. In the production of wall panels, every design, material and process combines technological innovation to make an exceptional modern product with an emphasis on reliability and ease of installation.

To finish our wall panels, we use water-based varnishes, natural oils and adhesives that are not harmful to health and the ecological system.

Our constant efforts to select raw materials and suppliers and to optimize the use of natural resources are fueled by our desire to preserve and improve the environment for future generations.

The wall panels create a complete interior solution in combination with CONTEMPORARY, SecretDoors or AluDoors concealed doors.

HOSET GROUP wall panels are the best solution for modern interiors.

СТІНОВІ ПАНЕЛІ
RAIL

SLIDING SYSTEMS TYPES

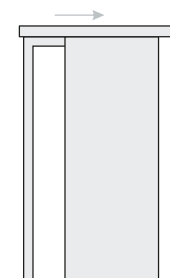

SLIDING DOORS FOR CEILING MOUNTING

Sliding ceiling mounting systems are an excellent solution for interiors where you plan to integrate doors from floor to ceiling. In this system, the upper rail is built into the ceiling and is not visible from the outside, only the door leaf remains visible.

All models except ARIA and ESTETICA can be made using the sliding system.

The door dimensions may be limited by the capabilities of the sliding system.

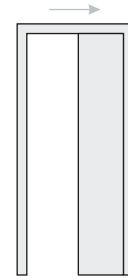

SLIDING DOORS FOR WALL MOUNTING

In this system, the upper rail is mounted directly to the wall and covered with a decorative cornice.

All models except ARIA and ESTETICA can be made using the sliding system.

The door dimensions may be limited by the capabilities of the sliding system.

SLIDING SYSTEMS TYPES

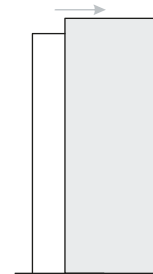

SLIDING DOORS INTO THE WALL

This option of mounting the sliding system implies that the door moves inside the doorway and slides into a specially formed niche.

All models except ARIA and ESTETICA can be made using the sliding system.

The door dimensions may be limited by the capabilities of the sliding system.

MAGIC SLIDING DOOR ON A CONCEALED TRACK

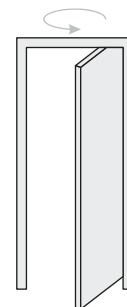

The Magic mechanism for sliding doors adds a kind of magical mystery to any interior, favorably concealing the doorway when the door is closed and adding an additional accent to the room when the door is open.

Sliding doors with a concealed mechanism are the perfect way to ensure complete interior unity.

All models except ARIA and ESTETICA can be made using the sliding system.

The door dimensions may be limited by the capabilities of the sliding system.

ROTARY AND FOLDING SYSTEMS

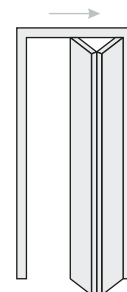

ROTARY DOORS

Rotary doors are a non-standard solution for saving space in the interior. Due to the unusual operation of the system, the doors work in both directions and can be opened in any direction in the direction of movement. At the same time, the door remains inside the opening in the open position, taking up a minimum of space.

All models except ARIA and ESTETICA can be made using the rotary system.

The door dimensions may be limited by the capabilities of the rotary system.

FOLDING DOORS

Ideal for dressing rooms, small rooms where the classic type of opening creates inconvenience.

The pivoting sliding door can be easily folded and then rotated and fixed at a 90° angle to the wall. Door leaf can be divided in half, or 2/3 or 1/3.

All models except ARIA and ESTETICA can be made using the folding system.

The door dimensions may be limited by the capabilities of the folding system.
