Liner length: 381 mm

Instructions for measuring a furniture tray installation drawer

Due to the fact that furniture companies use different pull-out systems, the internal dimensions of drawers are different. The company "ERCOBOX" manufactures classic trays in length and width in the maximum sizes for drawers with a length of 450 mm and 500 mm.

For a snug fit of the tray to the drawer and further convenience in the use of cutlery, it is necessary to fit the tray to the actual size of your drawer.

The outer edges of the side and rear expansion joints must be trimmed to fit the inside dimensions of your drawer (see Figure 1).

You need to determine two dimensions: the width (W) and the length (L) inside the box in mm.

Width (W) is the inside dimension from sidewall to sidewall of the box along the bottom (Fig. 2 or Fig. 3).

Length (L) is the internal dimension from the front to the back of the drawer (Fig. 4). **ATTENTION:** It is necessary to provide information on how the drawer is assembled, what extension system is used.

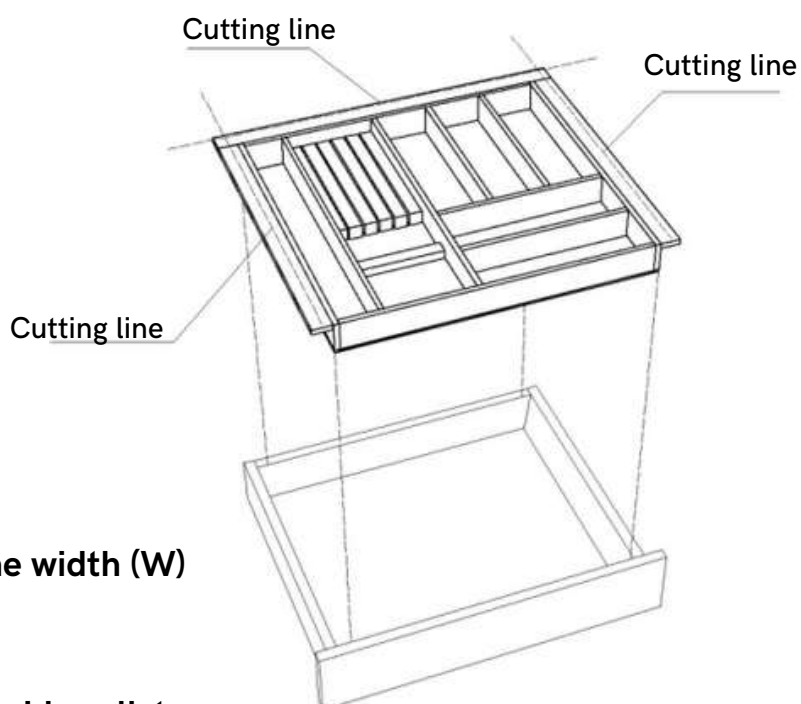

Fig.1

Material: ash
Liner Width: 133mm
Liner length: 393 mm

Insert for 4 compartments

Instructions for installing separate trays

Option 1. This arrangement of side expansion joints is suitable for all types of drawer sides:

Option 2. If the drawer has even sides, a side compensator is used or the bottom of the drawer is covered with an anti-slip mat:

1. the trays are joined to each other, and as a result we get the total width of the set. Filling the box 100% is done by trimming the side expansion joint to the remaining space. Alternatively, the box is first covered with an anti-slip mat, on which the trays are placed.

2. The trays have a maximum length of 500 mm for drawers with rails. The length of the trays is adjusted on the front (front) side through trimming.

3. After trimming the trays, the cutting places are treated with vegetable oil-wax (oil-wax is not included).

SLIDING TRAYS

Instructions for installing tall drawer accessories

1. The perforated bottom is trimmed symmetrically on 4 sides under the bottom of the box:

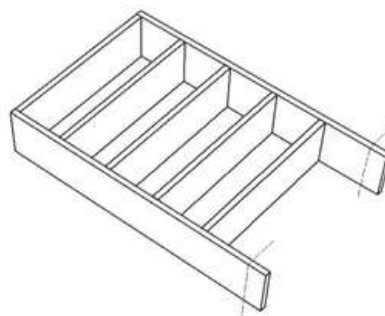

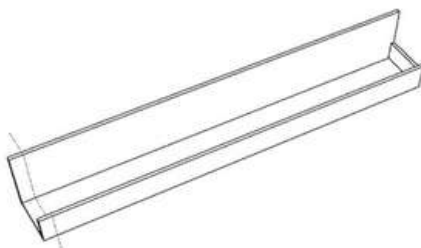

Includes feet that are attached to the back of the perforated bottom.

2. Bottle organizer and pan organizer are fixed to the bottom with two screws:

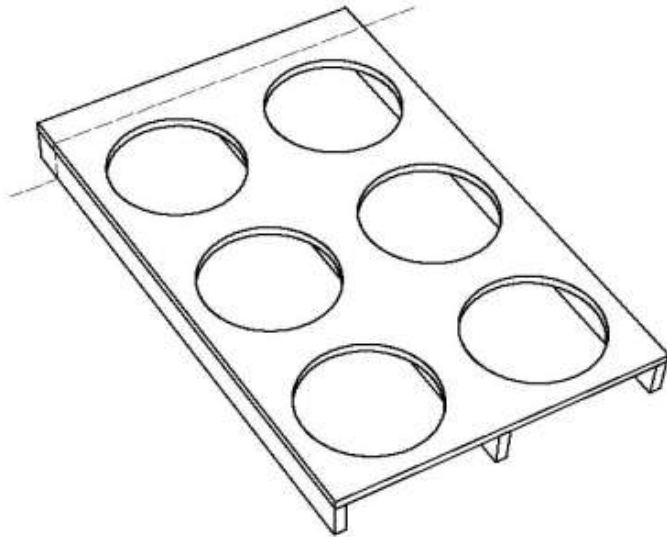

3. The lid organizers are trimmed to the width and length of the box:

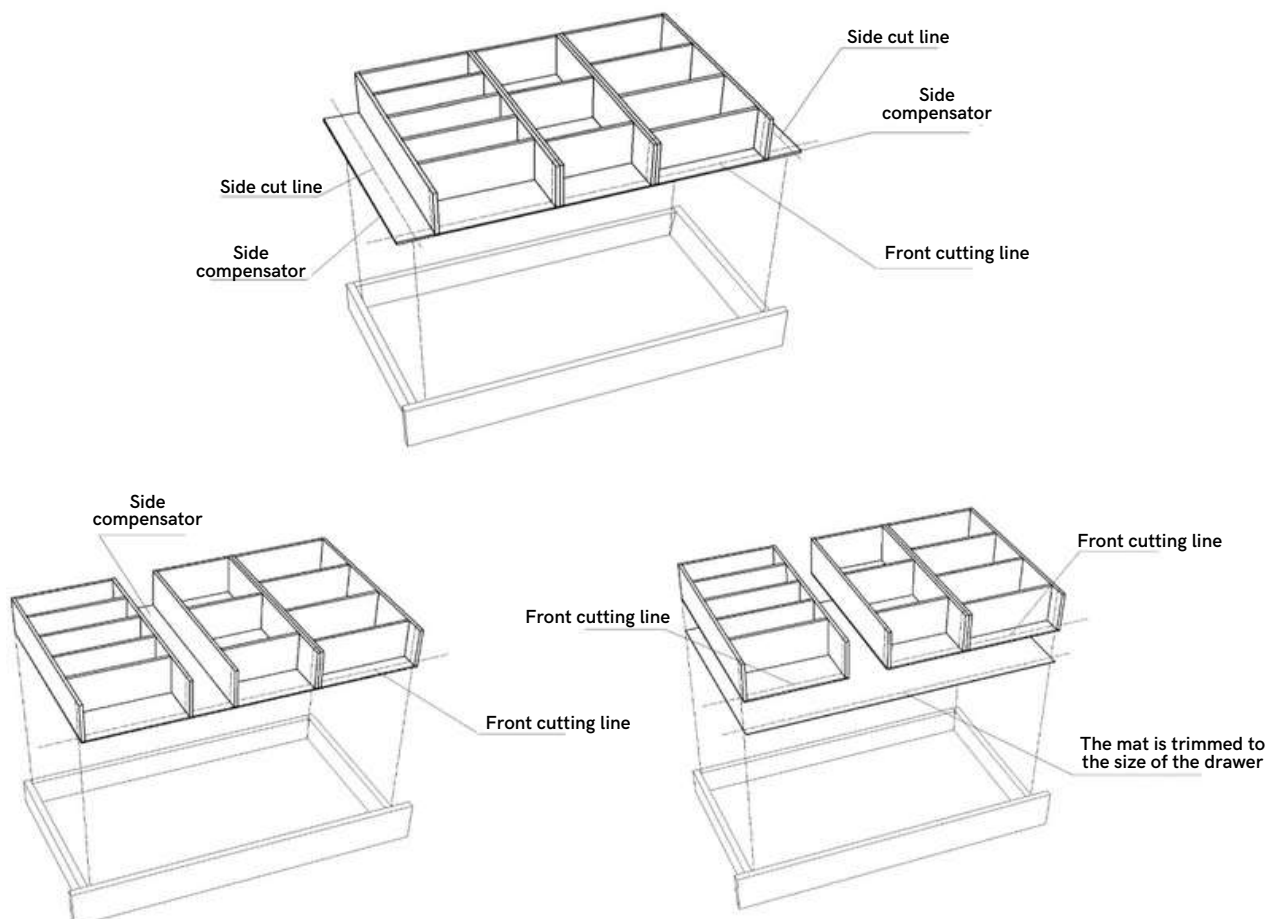

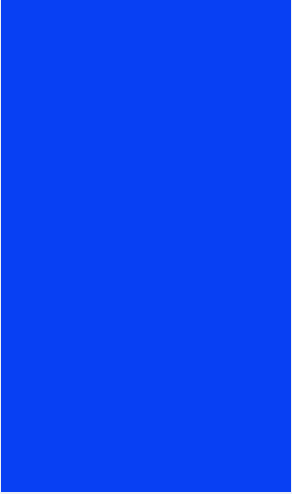

Instructions for installing tall drawer accessories

4. The can organizers are trimmed to length on the back side:

5. Instructions for installing separation organizers:
